38R	SUM OF NUMBERS AT PRIME FACTORS	^
, I	SUM OF NUMBERS AT PRIME FACTORS  Description  ARRANGE TO THE PRIME FACTORS	2305101
Ś	Prime factors of a positive integer are the prime numbers that divide that integer exactly.	\rangle^-
3RR23C5	Given an array arr of n integers and a positive integer num.	3BP
	Let's suppose prime factorization of num is: $p^a x q^b x r^c x \dots x z^f$ , where p,q,rz are prime numbers.	,1013BR
305701	Sum of numbers in array arr at indices of prime factors of number num is: a $x arr[p] + b x arr[q] + c x arr[r] + + f x arr[z]$ .	
300	You are given an array arr of size n and a positive integer num. You are required to calculate the sum of numbers in arr as mentioned above, and print the same.	3BR13C
BR	Note:	
013BR	<ul> <li>If arr is empty, print -1.</li> <li>If prime factor of num not found as indices, print 0.</li> </ul>	1305101
6	Input Format:	V
AR23C5	The input consists of three lines:	BR
· ~ ~ ~	<ul> <li>The first line contains an integer, i.e. n.</li> <li>The second line contains an array arr of length of n.</li> <li>The third line contains an integer num</li> </ul>	,1013BR
305707	The input will be read from the STDIN by the candidates.	230
	Output Format:	BRE
388	Print the sum that was mentioned in the problem statement.	
	Example:	305701
	Input:	V
	6	-8P
	11 21 32 45 1 23	389,3
	6 Output:	
	77	38
	Explanation:	38
